### Who Should Invest?

The FNB Namibia Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund seeks to achieve an investment medium for unit holders which has as its primary objective to provide superior money market returns and current income as is consistent with liquidity and capital preservation. The fund feeds into the Pointbreak Institutional Money Fund, which invests with the four major banking groups in Namibia and other similar rated institutions in South Africa. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.

### Fund Commentary

February headline inflation came in lower than consensus expectations at 4.40% in Namibia and 4.10% in South Africa, year-on-year.

Easing global financial conditions take pressure off the South African Reserve Bank to maintain a tightening bias. Subdued domestic demand and contained inflation expectations, make us less convinced that the SARB will lift rates during 2019.

The Namibian commercial bank liquidity has improved significantly during the first quarter of the year, squeezing the local credit & liquidity spread below 20bps across the money market curve.
