Who Should Invest?

The FNB Namibia Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian,- and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs. The FNB Namibia Money Market Fund is managed by Ashburton Unit Trust Management Company Ltd (89/485), a NAMFISA registered (25/9/5/3) Unit Trust Management Company.

Fund Commentary

December CPI inflation readings came in at 2.6% in Namibia and 4.0% in South Africa, on the back of slowing housing, food and transportation costs.

In its January meeting, the South African Reserve Bank has reduced its Repo Rate from 6.50% to 6.25% and prepared the market for further rate cuts throughout 2020. The South African money-market and short-bond curves steepened, on average, by 25bps up to the 5-year tenor. The Namibian excess commercial bank liquidity position remains under pressure, keeping local Treasury-Bill and NCD rates in check. As a result, the spread above South Africa opened to approximately 55bps on the long end of the local money-market curve.

We expect Bank of Namibia to follow the South African Repo cut in its February meeting, but lower commercial bank liquidity and fiscal demand to keep local rates elevated.

Past Performance

For the period ended 31 January 2020, annualised net of fees

Period	1-month	3-month	6-month	1-year	3-year
