Who Should Invest?

The FNB Namibia Corporate Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests primarily with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian,- and South African governments. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Historical Distributions

Month	Feb-21	Mar-21	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22

Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs. The FNB Namibia Corporate Fund is managed by Ashburton Unit Trust Management Company Ltd (89/485), a NAMFISA registered (25/9/5/3) Unit Trust Management Company.

Fund Commentary

Annual CPI inflation figures have peaked in December for 2021, coming in at 5.9% for South Africa and at 4.5% for Namibia. The South African Reserve Bank has hiked its repo rate by a second 25bpts to 4.00% at the end of January and prepared the market for further gradual increases throughout the year. The Bank of Namibia is expected to follow suit in February.

The Namibian NCD curve steepened further during the month, with the 12-month average rate lifting by 10bpts to 5.79%, and Treasury-Bills trading unchanged. In South Africa the NCD curve shifted up parallel by approximately 30bpts, while the Treasury-Bill curve flattened, with 12-month rates coming down by 20bpts.

Given the fund's duration profile we expect a continuous pass-through effect from rate hikes and gradual increase in yield going forward.
